

EMBLEM STAR Victory Vinyl

EMBLEM STAR Victory Vinyl

Matchcode:	SFOMPOXV
Material:	PVC-Film, monomeric self-adhesiv, microporous coating
Finish:	matt
Color:	white
Weight / Thickness:	100my
Liner	PE-coated Paper
Glue	Polyarylic, semipermanent
Adhesion	6 N / 25mm (AFERA)
Lamination	Cold, Solvent-glue
Gluing Temperatur	>15° C
Width of Rolls:	36" / 42" / 50" / 54" / 60"
Length of Rolls:	30 Meters
BubbleJet Dye:	yes
BubbleJet Pigment:	yes
Piezo Dye:	yes
Piezo Pigment:	yes
Piezo Öl:	no
Piezo Eco Solvent:	yes
Piezo Solvent:	no
Flameretardant:	no

Description:

EMBLEM SFOMPOXV is a special coated, calandered PVC-Film for digital printing with water- and eco-solvent inks. The film is coated with a microporous inkjet-coating.

The main field of application is the production of self-adhesiv prints for indoor and outdoor advertiments.

All inks, apart from dyebased inks, achieve water-resistant prints. We advice the user to laminate every print for outside use, to protect it from abrasion. Prints which have been produced with pigmented inks are smear- and waterresistant up to one year.

Every print which has been produced with dye-based ink has to be laminated to protect it against gas-fading.

It is possible to laminate SFOMPOXV without edge-protection by using EMBLEM lamination film with solvent glue. Professional handling eliminates the risk of intrusion of water by the edges for more than 3-5mm.

Before lamination the print has to be completely drye, otherwise there is the risk of of lumps.

The use of high ink-limits may cause clouding and longer drying times.

For the prevention of fingerprints it is advisable to use cotton gloves.
