

## TS-3838MER & TS-4050MER

TS-4050MER  
40 x 50 cm format

### TS-3838MER & TS-4050MER

These heat presses are affordable and soon profitable. They are recommended to begin in the heat transfer of small or medium productions. They fit perfectly in shops, sport clubs and association rooms, markets, festival or itinerant activities. The closing of the heating plate is parallel with the inferior plate that allows transferring products up to 4 cm thickness. The lateral clearance of the heating plate combined with the front pull out of the lower plate, offers more accessibility and a work comfort during logos or tee-shirts positioning.

### TS-4050MER - 40 X 50 CM FORMAT

Its large lower plate provides a better visibility for the logos or tee-shirts positioning, and allows A3 format marking and turns easy the application of texts with numbers in one step.

### «U» STAND

The U stand allows to put products on the below plate for double-sided transfer or on thick support such as polos with buttons, a shirt etc.... It also eases plate changes.

### 4 PLATEN KIT

Thanks to this 4 platen kit adaptable on all red PromaShirt, equipped with a "U" form stand, you can apply perfectly your logo on short and long sleeves, sport shorts, working clothes, luggages and umbrellas, etc. The 4 platen kit improves printing precision by avoiding the contact between the heat plate and the fragile zones of your supports: zips, snap buttons, double seams, elastics, straps, etc.

4 platen kit

### PLATE FOR SHOES

This interchangeable below plate allows an easy customization of all kind of shoes. It is available as an option for all Red Promatex International tee-shirt presses. It has a marking area of 5 x 10 cm which can be put at the side, the heel or the strip of the shoes.
